

Why You Should Read This: The document below reviews the environmental impact likely from a project. This project is planned to be federally funded through your tax dollars; therefore, you are entitled to take part in its review. If you have concerns about the environmental impact of this project, raise them now. We encourage public input in this decision making process.

IOWA STATE REVOLVING FUND
REAFFIRMATION OF A FINDING OF NO SIGNIFICANT IMPACT

4/2/2024

To: All Interested Citizens, Government Agencies, and Public Groups

An environmental review has been performed based on the procedures for implementing the National Environmental Policy Act (NEPA), for the proposed agency action below:

Applicant: City of Grand Junction
County: Greene
State: Iowa

SRF Number: CS1921111 01
Iowa DNR Project Number: 2021-351A

The purpose of this letter is to provide you with a State Revolving Fund (SRF) status update. This project has previously been reviewed by the DNR and a Categorical Exclusion (CX) was issued on August 15, 2023. This CX is hereby Reaffirmed including the following scope: Complete modifications to wastewater treatment facility influent and effluent flow metering, replace valves, and complete inflow and infiltration reduction study. Install lagoon depth gauges. Complete repairs to collection system pipe identified in the inflow and infiltration reduction study using cured-in-place lining (CIPP). One area of excavation will be required near 15th Street and Hager Street. This excavation is for a localized repair and will be approximately 30 feet long by 20 feet wide.

A petition had been made by the City of Grand Junction as of February 14, 2024 to revise this project scope to include the above listed work as a continuation of the ongoing construction project. The scope addition had not been previously evaluated by the DNR. It has now been determined by the DNR, and the State Historical Preservation Office has concurred (R&C #240337624), that the additional work will result in "No Historic Properties Affected." Given the scope and location of the proposed additional work, no other impacts of the environmental criteria listed in 40 CFR Part 6 are anticipated.

This action is taken on the basis of a careful review of the engineering report, the environmental assessment and other supporting data which are on file at the Department of Natural Resources' office in Des Moines, Iowa. These are available for public review upon request. This Department will not take any administrative action on the project for at least thirty (30) calendar days from the above date. Persons disagreeing with the above environmental decision may submit comments to the department during this period. Your comments can be sent to SRF-PC@dnr.iowa.gov or directly to me at James.Boatright@dnr.iowa.gov or (515) 782-2473.

Sincerely,

James Boatright
